

Medical Facilities

From the last Parish survey 125 of the 144 respondents were happy with the level of health care available to residents.

However, a number of issues were raised by residents including the following:

- prescription delivery service
- village Chiropody service
- Health Nurse visits

Whilst it is appreciated that not all residents use the Gnosall Surgery, the Patients' Forum has been invited to attend the Parish Plan Exhibition with their display boards. The Forum may also be able to explain the future developments of the surgery.

It is hoped that residents will take the opportunity to raise issues direct with the Patients' Forum, as these can be taken to future meetings with the Surgery.
